Summary

Computer Science graduate and **MERN Stack Developer** with hands-on experience building and deploying **real-world web applications from development to production**. Currently working as a **MERN Stack Developer Intern at Aflix Infotech Private Limited, Agra**, with experience developing **scalable business applications**, implementing secure user workflows, managing backend integrations, and deploying production-ready projects. Strong problem-solving ability with a focus on **clean, maintainable, and user-friendly applications**.

Education

GLA University, Mathura, Uttar Pradesh **May 2021 – June 2025**
B.Tech in Computer Science

Technical Skills

Languages:	JavaScript, Java, SQL
Frontend:	React.js, HTML5, CSS3, Vite
Backend:	Node.js, Express.js, REST APIs
Databases:	MongoDB, MongoDB Atlas, PostgreSQL, Supabase, MySQL
Tools & Deployment:	Git, GitHub, VS Code, Render, Vercel
Core Concepts:	Data Structures, Algorithms, OOP, DBMS, Problem Solving, Authentication, RBAC

Experience & Training

MERN Stack Developer Intern, Aflix Infotech Private Limited **Aug 2026 – Present**
Agra, Uttar Pradesh

- Developing and maintaining real-world full-stack web applications using React.js, Node.js, Express.js, MongoDB, and REST APIs.
- Worked on multiple development projects involving frontend, backend, database integration, authentication, API development, testing, debugging, and application optimization.
- Deployed and managed full-stack web applications using **Vercel and Render**, including frontend and backend deployment.

MERN Stack Developer Training, AccioJob **July 2025 – Dec 2025**
Noida, Uttar Pradesh

- Hands-on training in MongoDB, Express.js, React.js, and Node.js with practical full-stack project development.
- Focused on REST API development, database integration, authentication, deployment, and modern development workflows.
- Strengthened problem-solving and development skills through hands-on coding practice, debugging, and implementation of real-world web application features.

Projects

SchoolSphere – School Management System **[Live Demo]** *React.js, Node.js, Express.js, Supabase, PostgreSQL*

- Developed a full-stack school management platform supporting students, teachers, staff, parents, administrators, attendance, admissions, fees, payments, examinations, and academic management.
- Implemented secure authentication and **Role-Based Access Control (RBAC)** for Super Admin, School Admin, Teacher, Staff, Parent, and Student roles.
- Integrated **Supabase PostgreSQL** for centralized data storage with school-level data isolation, secure APIs, database migrations, and structured backend management.

Stock Room – Multi-Industry Inventory Management SaaS **[Live Demo]** *React.js, Vite, Node.js, Express.js, MongoDB Atlas*

- Developed a multi-industry inventory management SaaS platform for retail, wholesale, clothing, pharmacy, grocery, hardware, and other businesses.
- Implemented inventory tracking, product management, suppliers, customers, purchase and sales orders, POS billing, payments, returns, reports, low-stock alerts, and bulk product import.
- Built business-level data isolation and role-based functionality allowing multiple businesses and their team members to securely use the same application independently.
